**Table 1 :**

**Name:**tbl\_bookslot **Primary key:-**lid

**Foreign key:**userid reference from tbl\_users

| <b>Fiel<br/>d</b> | <b>Data type</b> | <b>Description</b>     |
|-------------------|------------------|------------------------|
| lid               | Int(11)          | Primary key            |
| cloth_type        | Varchar(20)      | Name of cloth          |
| Wash_type         | Varchar(20)      | Name of wash type      |
| quantity          | Varchar(20)      | Quantity of laundry    |
| Booking_date      | date             | Booking date           |
| delivery_date     | Date             | Expected delivery date |
| userid            | int(20)          | User id                |
| status            | Int(11)          | Laundry status         |
| placed            | Int(11)          | Laundry booking status |
| del_boy           | Int(11)          | Delivery boy assigning |

**Table 2 :**

**Name:-tbl\_cloth\_**

**Primary key:-id**

| Field | Data type   | Description |
|-------|-------------|-------------|
| id    | Int(11)     | Primary key |
| cloth | Int(11)     | cloth type  |
| price | Varchar(20) | Cloth price |

**Table 3 :**

**Name:-tbl\_wash\_type**

**Primary key:-id**

| Field     | Data type   | Description     |
|-----------|-------------|-----------------|
| id        | Int(11)     | Primary key     |
| wash_type | Int(11)     | Wash mode type  |
| price     | Varchar(20) | Wash mode price |

**Table 4 :**

**Name:-tbl\_login**

**Primary key:-login\_id**

**Foreign key:uid reference from usertype**

| Field    | Data type   | Description             |
|----------|-------------|-------------------------|
| login_id | Int(11)     | Primary key             |
| email    | Varchar(20) | Type of cloth           |
| password | Varchar(20) | Price of specified type |
| status   | Tinyint(1)  | Status of login type    |
| uid      | Int(11)     | Foreign key             |

**Table 5 :**

**Name:-tbl\_users**

**Primary key:user\_id**

**Foreign key:login\_id reference from tbl\_login**

| Field    | Data type    | Description  |
|----------|--------------|--------------|
| user_id  | Int(11)      | Primary key  |
| login_id | Int(11)      | Foreign key  |
| name     | varchar(20)  | Name of user |
| phone    | varchar (10) | Phone number |
| address  | varchar(50)  | Address      |

**Table 6 :**

**Name:** usertype

**Primary key :**uid

| Field | Data type   | Descripti<br>on |
|-------|-------------|-----------------|
| uid   | Int(11)     | Primary key     |
| utype | varchar(20) | Usertype        |

**Table 7 :**

**Name:-tbl\_order**

**Primarykey:**orderid

| Field       | Data type   | Description        |
|-------------|-------------|--------------------|
| order_id    | Int(11)     | Primary key        |
| booking_id  | Int(11)     | Booking id         |
| Login_id    | int(20)     | Login id           |
| amount      | int (10)    | amount             |
| Transaction | varchar(50) | Transaction status |

**Table 8 :**

**Name:- tbl\_payment**

**Primarykey: payment\_id**

| Field      | Data type   | Description        |
|------------|-------------|--------------------|
| payment_id | Int(11)     | Primary key        |
| User_id    | Int(11)     | User id            |
| booking_id | Int(11)     | Booking id         |
| date       | date        | Login id           |
| amount     | int (10)    | amount             |
| Pay_status | varchar(50) | Transaction status |

**Table 9:**

**Name:tbl\_assign**

**Primary key: aid**

| Field      | Data type   | Description                |
|------------|-------------|----------------------------|
| id         | Int(11)     | Primary key                |
| Booking_id | Int(11)     | Booking ID                 |
| name       | Varchar(11) | Name of customer           |
| date       | Date        | Date                       |
| delboy     | int (10)    | Assigned delivery boy      |
| status     | varchar(50) | Pickup and delivery status |

**Table 10 :**

**Name:feedback**

**Primary key: fid**

| Field          | Data type   | Description     |
|----------------|-------------|-----------------|
| fid            | Int(11)     | Primary key     |
| date           | date        | Date            |
| feedback       | Varchar(11) | Feedback        |
| Feedback_reply | Varchar(11) | Feedback reply  |
| userid         | int (10)    | User id         |
| status         | varchar(50) | feedback status |
